IDSNY Virtual Career Development Seminar for Trainees & Junior Faculty Monday, May 9, 2022

**INFECTIOUS
DISEASES
SOCIETY OF
NEW YORK**

Register at: <https://www.idsny.org/registration-form>

Learning Objectives:

AMR Panel:

- Recognize the global scope of antimicrobial resistance (AMR) and its status as federal and public health priority
- Evaluate the state of new drug development in context of the growing AMR crisis
- Discuss diverse yet intersecting career paths devoted to AMR (hospital stewardship/epidemiology, healthcare leadership, public health and policy, data science, and clinical research)
- Understand federal legislation accelerated by the COVID-19 pandemic focused on AMR, stewardship, infection prevention, and public health

Mentor/Mentee Workshop:

- Define elements of successful professional relationships (mentor/mentee, sponsor, coach, etc.)
- Understand how relationships grow and change overtime in response to evolving needs
- Apply strategies to optimize your current professional relationships and develop new ones
